How to change the GUI language in VisTitle 1.6
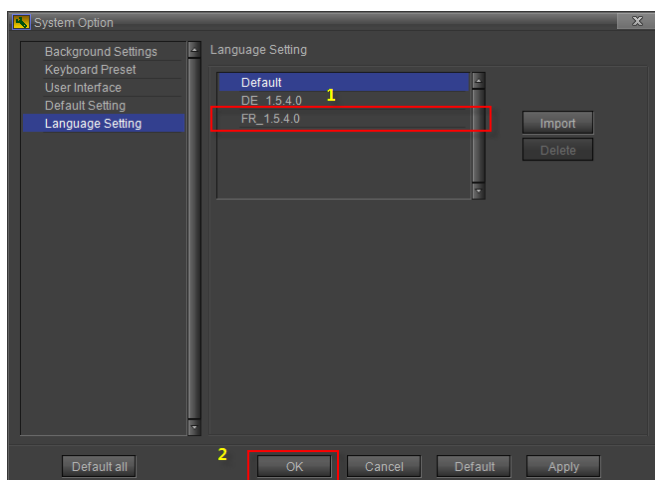

1) Run VisTitle, after enter into the program, press "Ctrl+Shift+O" to get into the system option dialog, and then select the "Language Settting" page

2) Import your language PID files, which will be appended to the language list in left

3) Select the language item which is your wanted GUI language, then press OK

4) Restart VisTitle, you will get your selected language.
